Most exhibit companies make you request a quote to learn anything. We publish our starting ranges so you can budget today. Every figure below is a starting point for a fully custom-fabricated booth at a Canadian show, quoted in Canadian dollars — your accurate price still comes from a designer, and takes one business day once you send your show, footprint and dates. 2027 space is being contracted now — the best fabrication windows go first.

STARTING-FROM PRICES BY FOOTPRINT AND BUILD LEVEL

Every footprint is quoted at three build levels, and every figure is a starting-from price. What moves a project up a level is the amount of structure, the depth of customisation, and how much AV and lighting is integrated into the build.

BOOTH SIZE / BUILD LEVEL	CUSTOM RENTAL FROM	OWNED BUILD FROM
10×10 in-line · 100 sq ft		
Standard — from	**$17,000**	**$30,000**
Premium — from	**$20,500**	**$36,000**
Flagship — from	**$24,000**	**$42,000**
10×20 in-line · 200 sq ft		
Standard — from	**$24,000**	**$44,000**
Premium — from	**$29,000**	**$53,000**
Flagship — from	**$33,500**	**$61,500**
20×20 island · 400 sq ft		
Standard — from	**$41,000**	**$82,000**
Premium — from	**$49,000**	**$98,500**
Flagship — from	**$57,500**	**$115,000**
20×30+ island · 600+ sq ft		
Standard — from	**$68,000**	**$130,000**
Premium — from	**$81,500**	**$156,000**
Flagship — from	**$95,000**	**$182,000**

WHAT EACH BUILD LEVEL INCLUDES

- Standard booth — Clean custom architecture, printed graphics and standard lighting. This is the starting-from price for the footprint.
- Premium booth — More structure and custom detailing, backlit feature walls, millwork counters and a larger integrated AV and lighting package.
- Flagship booth — Heavily customised architecture, enclosed meeting rooms and second-storey or overhead structure, with extensive LED, lighting and full AV integration.

INCLUDED IN EVERY RENTAL PRICE

- Custom design and photoreal 3D renders — complimentary, before you commit
- Fabrication of structure, walls, counters and feature elements
- Printed graphics produced fresh for the show
- Standard booth lighting
- Setup drawings, CAD and venue submission documents
- Project management from kickoff to teardown
- Post-show recovery of the structure — no storage cost to you

BILLED SEPARATELY — AND BY WHOM

Drayage / material handling
Billed by the venue's contractor on crated weight. We coordinate and optimise it; the invoice is theirs.

Electrical, rigging and internet
Venue-controlled services ordered in advance. We file the orders on your behalf.

Freight to and from the show
Quoted per lane; cross-border adds broker fees.

Install & dismantle labour
Quoted per show. Toronto, Montreal and Vancouver carry the highest Canadian labour rates; secondary markets are materially cheaper.

Booth space rental
Paid directly to the show organiser.

Show cleaning and furniture
Ordered through the general contractor.

WHAT SHOW SERVICES REALLY ADD

Show services are ordered through the venue's general contractor, not through us. We coordinate and optimise them, but the invoice is theirs. Budget for them on top of booth cost:

Regional Canadian market (Halifax, Ottawa, Calgary)	**Roughly 25–40% of booth cost**
Major Canadian market (Toronto, Vancouver, Montreal)	**Roughly 35–50% of booth cost**
Cross-border show shipping into the US	**Add customs brokerage, duty deposit and carnet handling**

Booking early matters more than negotiating: hitting the venue's advance-order deadlines is typically worth 20–35% on show services by itself.

Only one way to get your real number: ask us. Every booth is custom, so these are starting ranges — one email or call with your show, footprint and dates gets accurate pricing back within one business day, no obligation.

WHAT MOVES THE PRICE WITHIN A RANGE

- How much structure the design carries — walls, towers, enclosed rooms, overhead and second-storey elements
- Level of customisation — bespoke millwork, shaped forms and one-off detailing versus repeatable architecture
- AV integration — a single monitor versus a tiled LED wall with content and on-site techs
- Enclosed structures: meeting rooms, storage and second storeys all add engineering and weight
- Weight itself, because drayage is billed per hundredweight — heavier booths cost more every show
- Show city, since strict union jurisdictions carry materially higher install and dismantle labour

SIX WAYS TO SPEND LESS WITHOUT SHRINKING YOUR PRESENCE

- Hit every advance-order deadline. This is the single largest controllable saving — typically 20–35% on show services.
- Design for weight. Aluminium framing and tension fabric in place of hard panels can cut drayage substantially on a large booth.
- Rent the structure, own the graphics. You keep brand control and lose the storage, refurbishment and return-freight bills.
- Reuse the architecture across a season and change only the graphics package between shows.
- Order electrical once, correctly. Same-day changes on the show floor are billed at the highest rate on the sheet.
- Pick one hero moment instead of five good ones. Concentrated budget reads bigger on the floor than evenly spread budget.

Get your exact quote — plus a complimentary 3D design

These ranges are starting points only. Send us your show, footprint and dates and a Traction X designer replies within one business day with accurate pricing and a photoreal 3D concept, free and yours to keep.
